Sai

Make it better together

Energy Policy

Effective on: 24th June 2026

Sai Life Sciences is committed to effective energy management as an integral part of its operations. We aim to improve energy performance by enhancing energy efficiency, optimizing energy use, and reducing energy consumption across all activities, while supporting sustainable business practices

We are committed to:

- Continual improvement in energy performance, including energy efficiency, energy use, and energy consumption.
- Ensuring the availability of information, infrastructure, and necessary resources to achieve energy objectives and targets.
- Complying with all applicable legal, regulatory, and other requirements related to energy use and consumption.
- Establishing and reviewing energy objectives and targets at relevant functions and levels.
- Monitoring, measuring, and analysing energy performance using appropriate indicators and baselines.
- Supporting the procurement of energy-efficient products, equipment, and services that impact energy performance.
- Promoting energy-efficient design in new facilities, as well as in the modification and renovation of existing processes and infrastructure.
- Increasing the use of renewable energy sources wherever technically and commercially feasible.
- Ensuring operational control to optimize energy use and prevent energy wastage.
- Creating awareness and strengthening competency among employees and relevant stakeholders on energy management practices.

Sai Life Sciences shall:

- Integrate energy management into business processes and decision-making.
- Periodically review energy performance against defined objectives, targets, and baselines.
- Identify opportunities to improve energy performance and implement necessary actions.
- Maintain documented information to support energy management and performance evaluation.

This policy will be communicated to all employees and relevant stakeholders and will be reviewed periodically to ensure its continued suitability and effectiveness.
